

## California's first roofing and solar company is the only one you need for both.

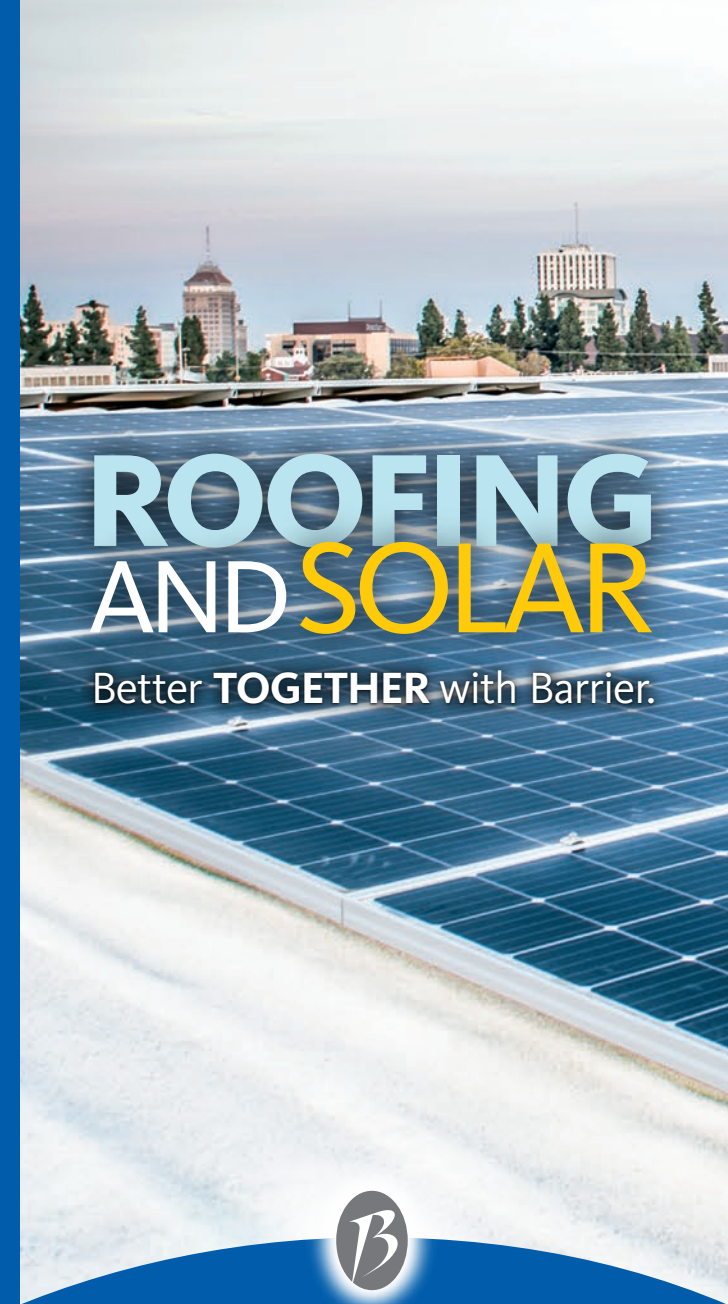

Not every roofing contractor knows how to work with solar energy systems. Not every solar company understands how an energy system impacts the roof. But one company has expertise in both: **Barrier**.

As California's first integrated roofing and solar company, **Barrier** is uniquely qualified to meet both your roofing and solar needs. So whether you need a basic roof repair or a state-of-the-art new cool roof... an energy-efficient new solar system or a service call on your existing unit... **Barrier** is the only name you need to know.

## ROOFING

The top-of-the-building experts.

### APPLICATIONS:

#### Retrofit or New Construction

Commercial/Industrial/Agricultural

- **Polyurethane Foam:** for a protective, seamless, waterproof membrane over almost any substrate
- **Roof Restoration:** over existing built-up and single-ply to prolong life when insulation is not desired
- **Metal Roof Coatings:** systems that restore metal roofs into seamless cool roofs
- **Single-Ply Systems:** rubber membranes seamlessly welded for monolithic coverage

### BENEFITS:

- **Cool Roof Systems:** to meet state requirements and save energy costs
- **Expert Installation:** with minimal disruption to your business
- **Green-Friendly:** energy-efficient, long-lasting roofing solutions
- **Peace of Mind:** with 10-, 15- and 20-year warranties

## COATINGS & INSULATION

We've got you covered.

### APPLICATIONS:

#### Retrofit or New Construction

Commercial/Industrial/Agricultural

#### Coatings for...

- **Industrial waterproofing – corrosion proofing – food processing – tank/pond linings – more**

#### BENEFITS:

- **Increased Lifespan:** protection from rust, corrosion, abrasion and harsh chemicals
- **Protection from the Environment:** water, outside elements, deterioration
- **Expert Installation:** with minimal disruption to your business

#### Insulation for...

- **Cold storage – holding tanks – airtight applications – more**

#### BENEFITS:

- **Energy Efficient:** high R value available
- **Continuous Barrier:** seamlessly blocks moisture, gas, odor, noise and more
- **Protected Environment:** airtight protection against dirt, mold and irritants
- **High-Tech Solution:** for the entire building envelope

## SOLAR

Harness the sun's power... and slash your energy costs.

### APPLICATIONS:

#### Retrofit or New Construction

Commercial/Industrial/Agricultural/Residential

- **Solar System Design:** customized to your energy and structural needs
- **Rebate and Financing Monitoring:** take advantage of available funding and your system could pay for itself in just 5-7 years
- **Mounting Options:** photovoltaic panel arrays can be mounted on roofs, ground or carports

### BENEFITS:

- **Efficient:** money-saving energy production systems
- **Seamless Integration:** for maximum efficiency and aesthetic value
- **Continuous Monitoring:** Barrier will track your energy production to ensure proper operation
- **Up to 50% Savings:** with government rebates and incentive programs
